

# Rainbow Paper Supplies & Instructions

## Supplies:

- Bowl of water
- Black construction paper
- Scissors
- Clear nail polish
- Q-Tips

## Directions:

1. Cut or tear black construction paper to a size that will fit into your bowl
2. Fill your bowl with water about half-way
3. Using the clear nail polish, pour 1-2 drops into the bowl of water
4. Wait a few seconds, then lay the paper flat on the surface of the water and begin to submerge the paper underwater
5. Let the paper dry on a paper towel
6. If there is leftover polish in the bowl, use a cotton swab to get the water clear of nail polish before trying again
7. Repeat!

\*If you wait too long after dropping in the nail polish, it will create a film on the surface and you will need to re-do\*

Here are some examples of successful attempts!
